

In The Claims:

Please cancel claims 1-31, 35, 37, and 40-42. The status of all claims is as follows:

1-31. (Cancelled)

32. (Original) A liquid crystal display device comprising:
a display part having pixels arranged in a matrix formation;
signal lines and scan lines connected to the pixels;
analog switches respectively connected to the signal lines;
a data driver which is connected to the analog switches via common
signal lines and supplies display signals to the signal lines via the analog switches; and
a reset circuit which resets the potentials of the signal lines and/or the
common signal lines to a predetermined potential with a given period.

33. (Original) The liquid crystal display device as claimed in
claim 32, wherein the reset circuit is connected to the signal lines.

34. (Original) The liquid crystal display device as claimed in
claim 32, wherein the reset circuit is connected to an output part of the driver.

35. (Cancelled)

36. (Original) The liquid crystal display device as claimed in claim 32, wherein the reset circuit is connected to the common signal lines.

37. (Cancelled)

38. (Original) The liquid crystal display device as claimed in claim 32, wherein the reset circuit receives a reset signal externally applied thereto during a blanking period included in a horizontal period and resets the potentials of the signal lines to the predetermined potential during the blanking period.

39. (Original) The liquid crystal display device as claimed in claim 32, wherein a polarity of the predetermined potential is inverted in synchronism with the polarity of the display signals.

40-42. (Cancelled)
